SECURE
PRINTING

We know you need quick results /This is Why we've made things simple.

Most people like to get things done quickly **/This is Why** we've cut out the queues.

If you hate queuing, you'll love our Print Release Lite Software (MX-SW300). It works by storing your print jobs until you're ready to collect them. When you are ready, simply walk up to any Sharp MFP* on your network, log on and choose the documents you want. They'll be printed immediately.

It's a simple idea, but the benefits in productivity, security and economy are profound.

Pump up your productivity

No one should have to waste time waiting on a machine. After all, they're supposed to make life easier. That's the thinking behind our Print Release Lite Software.

If your preferred MFP needs topping up with toner or paper, or somebody else is using it, don't wait around - just stroll up to another one* and have your documents printed there.

You get the documents you need, just when you need them, wherever you are. You can say goodbye to print queue congestion forever.

Quick and easy login

View all jobs

* MX-SW300 requires a Sharp OSA (Open Systems Architecture)-enabled MFP with the MX-AMX2 module installed.

Sharing isn't always a good idea /This is Why we help protect confidential documents.

Normally, everything you print spends at least some time out in the open. Anyone could read it - once the damage has been done it can't be undone.

With our Print Release Lite Software your documents won't be printed until you are present at the MFP and have personally identified yourself. What's more, no one else will be able to retrieve or even see your documents. All your private information will stay private.

Reduce waste, too

Even if your documents aren't confidential it can still be annoying if they get mixed up with other jobs and taken away. It means returning to your desk, repeating the entire job and hurrying back to collect your documents.

Now you can call for your documents directly from the control panel of the MFP. As soon as they're printed you can pick them up and take them away. Changed your mind? No problem. Simply delete the documents you don't need and save on toner, paper and energy.

WELCOME TO SHARP

Sharp has been manufacturing fast, reliable printers and MFPs - and devising new, more productive ways of managing documents - for decades. Many have won awards from respected independent research establishments. All have delivered class-leading performance, often transforming productivity in the workplace.

Sharp is a truly global company with local representation in all major countries. And our expertise now extends far beyond the realm of office printing. Today we address the needs of the whole enterprise, with innovations in LCDs, laser diodes, flash memory, solar cells, plasmacluster air purifiers, and projectors, to name just a few.

HARDWARE REQUIREMENTS

Processor speed (GHz) (Min)	1.5
HDD (GB) (Min)	25
RAM (GB) (Min)	1

MFP REQUIREMENTS

Sharp OSA 2.0 (or above) enabled MFP
MX-AMX2
Number of concurrent MFPs supported is dependent on server hardware - no Sharp software limitation

SOFTWARE REQUIREMENTS

Java (supplied with installer)
Internet Explorer 6 (or above) or Firefox 3 (or above)

SUPPORTED OS

32 or 64 bit	Windows® XP Professional Windows Server® 2003 Standard & Enterprise Windows Server® 2003 R2 Standard & Enterprise Windows Server® 2008 Standard & Enterprise Windows Vista® Business Windows® 7 Professional
64 bit	Windows Server® 2008 R2 Standard & Enterprise
